Muhammad Rizky

👤 Profile

Proficient **full-stack developer** with a comprehensive skill set. Skilled in crafting high-quality code and proficient in leveraging **Ruby on Rails** for backend development, along with frontend technologies for creating dynamic web applications. Passionate about continuous learning.

🎓 Education

Le Wagon

2024

10-week full-time intensive programing bootcamp where I achived the essential skills for programing, spanning both back-end and front-end tools. I not only mastered the technical aspects but also cultivated a strong problem-solving mindset and collaborative work ethic. Collaborating with other international teammates we developed one mobile and one web app projects.

Bachelor, Istanbul 29 Mayis University

2013 - 2018

Over the course of four years, I delved into the study of Islamic Theology, fully supported by a prestigious scholarship.

💼 Professional Experience

Project Coordinator at HAYDER, Istanbul

2018 - 2022

Responsible for maintaining formal relations with international humanitarian associations regarding aid projects in the concerned regions and to monitor the ongoing projects with reports related to every aspect of them.

Graphic Design at MIHMANDAR, Istanbul

2017 - 2018

Responsible for designing materials for the introduction and publicity of the association and for managing them on social media.

📈 Projects

SYNC Game

Rails, Devise, HTML, sCSS, JavaScript, Stimulus

A mobile app for multiplayer that challenges players to predict the position of a hidden number within a given range. The game features dynamic gameplay with action cable installed and a chat feature for social interaction after each match.

Web Surfer

Rails, Devise, HTML, sCSS, JavaScript, Stimulus

Working as a team we created an MVC app for renting surfboard, featured with geocoding to display map and working with Active record as database
