Muhammad Rizky

👤 Profile

Proficient full-stack developer with a comprehensive skill set. Skilled in crafting high-quality code and proficient in leveraging Ruby and Rails. Passionate about continuous learning. I value collaboration and teamwork, recognizing the power of collective innovation in achieving goals.

📈 Projects   **View my Portfolio**

SYNC Game App   – Rails, PostgreSQL, ActiveRecord, ERB HTML, sCSS, JavaScript
A mobile app for multiplayer that challenges players to predict the position of a hidden number within a given range. The game features dynamic gameplay with action cable installed and a chat feature for social interaction after each match.

Surfboard Rent App   – Rails, PostgreSQL, ActiveRecord, ERB HTML, sCSS, JavaScript
A dynamic MVC application integrates geocoding technology to provide users with interactive maps, enhancing browsing experience and facilitating location based search engine. Utilizing Cloudinary integration for photos upload.

My Movie Search   – Rails, ActiveRecord, ERB HTML, sCSS, API
A movie search engine powered by Ruby on Rails. This app utilizes plain Active Record to swiftly search through a vast database of movie titles. It's database-free, seamlessly fetching movie data in real-time from an open API source.

💼 Professional Experience

Project Coordinator at HAYDER, Istanbul   2018 - 2022

Responsible for maintaining formal relations with international humanitarian associations regarding aid projects in the concerned regions and to monitor the ongoing projects with reports related to every aspect of them.

Graphic Design at MIHMANDAR, Istanbul   2017 - 2018

Responsible for designing materials for the introduction and publicity of the association and for managing them on social media using **Photoshop** and **Illustrator**. My work significantly contributed to increasing the association's visibility and online

🎓 Education

Le Wagon, Web Development   2024

Intensive programing bootcamp where I achived the essential skills for programing, spanning both **back-end** and **front-end** tools. Mastered a problem solving mindset and **collaborative work** ethic. Learned how to analyze and solve problems effectively. Developed several **dynamic apps from scratch.**

Coursera - IBM, Fullstack Development   2024

Gained my skills through hands-on projects and intensive courses. By building **practical projects**, I ensured that my learning was not just theoretical. I passed these courses with high scores, earning prestigious **certificates** that are recognized in the industry.

Bachelor, Istanbul 29 Mayis University   2018

A Bachelor's degree in Theology, where I gained a deep understanding of religious studies and philosophical concepts. This background has equiped me with **critical thinking and cultural awarness.** Fully supported by a prestigious scholarship.
